(2) means for giving the retrieval ID ~~for retrieving~~  
~~digital image data~~ to the digital image data transferred from the  
image input apparatus, for transmitting the retrieval ID to the  
image input apparatus, and for storing on the image server the  
digital image data in association with the retrieval ID.

2. (Currently Amended) The photographic service system of  
claim 1, ~~wherein at least one of the image input apparatus~~  
~~comprises~~ further comprising:

means for ~~capturing~~ retrieving the digital image data from  
5 the image server by inputting the retrieval ID ~~for retrieving;~~  
and

means for storing the ~~captured~~ retrieved image data ~~in~~ on a  
detachable external memory medium.

3. (Currently Amended) The photographic service system of  
claim 1, further comprising a client computer, ~~having~~ said client  
computer comprising:

means for communicating with the image server through ~~a~~ the  
5 network; [[,]]

~~wherein the image input apparatus comprises means for~~  
~~issuing, after receiving the order, a home page address, an ID~~  
~~for retrieving digital image data and an index print, and the~~  
~~client computer further comprises,~~

means for reading out the order data file and for reading  
out the digital image data from the image server based on the  
15 basis of the retrieval ID for retrieving recorded in the read  
out order data file; and

means for producing a digital print based on ~~the basis of~~  
the order data file.

5. (Currently Amended) The photographic service system of  
claim 1, further comprising means for producing a digital print  
from the digital image data stored in the image server; [[,]]

wherein the image input apparatus further comprises means  
5 for issuing an order form with an the index print attached in  
which thereto, said order form including the retrieval ID and a  
column to be filled with in which an order for the digital print  
is to be entered. and an ID for retrieving digital image data are  
described.

6. (Currently Amended) The photographic service system of  
claim 1, wherein the image input apparatus further comprises  
means for issuing an order form with ~~an~~ the index print attached  
in which thereto, said order form including the retrieval ID, at  
5 least one of a telephone number and a facsimile number, and a  
column to be filled with in which an order for a digital print is  
to be entered. , an ID for retrieving digital image data, and at
